**Great Need for Technical Writers Cited**

In the January-June 1960 issue of the Army-Navy-Air Force Register and Defense times, 33 companies surveyed throughout the United States listed vacancies for 5972 technical writers. These 33 companies listed technical writers as their greatest need. One Los Angeles firm listed 500 technical writers needed in one division and 800 in another division. Another listed openings for 700. Opportunities are unlimited. The wage scale is high. In the March 1 issue of National Business Woman's magazine, the magazine of the National Federation of Business and Professional Women's Clubs, is an article that states "There are opportunities for technical writers we can't even publicize yet because we're so busy trying to fill the immediate openings."
